

10 Nights The Kimberley Cruise Darwin to Broome (Coral Discoverer)

Itinerary

Day 1: Depart Darwin

Board your Coral Expeditions ship at 8.00am where there is time to settle into your cabin before our 9.00am departure. Spend a luxuriant sea day at leisure as we cruise across Joseph Bonaparte Gulf and sail into Western Australian waters. Take the time to become acquainted with all the facilities onboard and join our Expedition Team in the Lounge for an insightful introduction to the Kimberley. As dusk falls meet your fellow travellers, the Captain and crew for the Captain's Welcome Drinks.

Day 2: King George River and Falls

Fed by the King George River draining across the Gardner Plateau, 80m tall King George Falls are the most impressive Kimberley waterfalls and the highest twin falls in Western Australia. Before reaching the mist-like spray rising from the base of King George Falls, we cruise through steep-sided gorges carved by a flooded river system that carved a swathe through the Kimberley landscape 400 million years ago.

Early in the waterfall season, we may cruise around the base of impressive King George Falls while in later months we take the opportunity to view the honeycomb erosion patterns of sandstone cliffs up close.

Day 3: Vansittart Bay DC3 and Jar Island

Vansittart Bay is home to many cultural and historically significant sites like the remarkable Gwion Gwion (Bradshaw) Aboriginal rock art galleries estimated to be up to 20,000 years old. Jar Island is so-named after the pot shards found here, brought to the island by Macassan fisherman harvesting sea cucumbers (also known as trepang).

Nearby, on the Anjo Peninsula lies the well-preserved wreckage of a US Airforce C-53 Skytrooper aircraft, the result of a pilot losing his bearings flying from Perth to Broome in 1942 and putting down on a salt pan near present-day Truscott Airbase.

Day 4: Mitchell Falls, Winyalkan & Swift Bay

Tumbling down the Mitchell Plateau in a series of tiered waterfalls and emerald green rock pools, the Mitchell Falls are the photogenic poster child for the Mitchell River National Park. Take a scenic helicopter flight (additional cost) to multi-tiered Mitchell Falls where emerald-hued rock pools cascade down the escarpment and ancient rock art galleries are concealed in caves behind curtains of water.

Mitchell River National Park is inhabited by significant numbers of mammals, amphibians, reptiles and bird species which are lured by a year-round water source. Sandstone terraces beside tiered rock pools make a terrific viewing platform from which to savor the serenity of this ancient landscape.

An alternative option to Mitchell Falls is exploring the sandstone caves of Hathway's Hideaway. This mass of weathered tunnels, arches and columns form a labyrinth-like maze and was once an Aboriginal midden. Another option while anchored at Winyalkan Bay is a visit to a series Wandjina and Gwion Gwion rock art galleries at Swift Bay.

In the evening we will enjoy watching the sunset over the Indian Ocean while indulging in a gourmet BBQ.

Day 5: Prince Frederick Harbour

Prince Frederick Harbour is one of the Kimberley's most spectacular locations at the southern end of York Sound. The harbour is dotted with islands lined with mangroves and monsoon rainforests, set against a backdrop of the ochre-hued escarpment.

White-bellied sea eagles and other birds of prey are often seen here, and at low tide, expansive mudflats reveal large populations of mudskippers and mangrove crabs. We will take our Xplorer tender vessels on a cruise up Porosus Creek to view some striking rock formations.

Day 6: Prince Regent River & Careening Bay

King Cascade is a classically beautiful terraced waterfall and is one of the most photographed waterfalls in the Kimberley. Falling from a considerable height and around 50m across, water tumbles down a staggered terrace of Kimberley sandstone. Layer upon layer of ochre-hued and blackened rock sprouts grasses, mosses and ferns in a sort of lushly vegetated hanging garden. We reach King Cascade after cruising in our Xplorer tender vessels down the steep-sided Prince Regent River which is a remarkable anomaly as the river runs dead straight along a fault line. Lt. Philip Parker King named nearby Careening Bay after he beached his leaking vessel HMC Mermaid to effect repairs. While stranded on this remote coastline for 17 days the ship's carpenter carved *HMC Mermaid 1820* into the bottle-shaped trunk of a boab tree near the beach. Almost 200 years later, the Mermaid Boab Tree has since split into two trunks and sports a mammoth girth of 12m. Significantly, the bulbous tree is listed on the National Register of Big Trees and the carpenter's careful inscription now stands almost as tall as a person.

Day 7: Montgomery Reef

Montgomery Reef is a biologically diverse area covering over 300 sq km and was named by Phillip Parker King. Twice daily, as the sea recedes in mammoth 11m tides, Montgomery Reef rises from the Indian Ocean in a cascade of rushing water revealing a flat-topped reef pockmarked with rock pools and rivulets.

As the reef emerges, we get up close in our Xplorer and Zodiac inflatable tenders to witness the spectacle as our Expedition Team share their knowledge on the formation of the reef and the myriad wildlife. Opportunistic birds take advantage of the emerging reef, feeding on marine life left exposed in rock pools. Turtles, dolphins, dugongs and sawfish too are also attracted to feeding opportunities as the ocean recedes.

The ocean is awash in a swirl of eddies and whirlpools as the moon's gravitational force takes hold. Then, a few hours later the entire water-borne drama is reversed as the tide comes in and Montgomery Reef disappears below sea level.

Day 8: Doubtful Bay

Raft Point guards the entrance to Doubtful Bay, a vast body of sheltered water which harbours significant sites such as the ancient Wandjina rock art galleries located a short walk from the beach and are considered some of the finest in the Kimberley and we visit the rock art galleries when traditional owners are available to guide us. Doubtful Bay is the traditional country of the Worrora people who follow the Wandjina, their god, law-maker and creator. Images of Wandjina are found throughout the Kimberley, recording their stories, knowledge and culture in stone. Red Cone Creek flows gently downstream until it meets the small but impressive Ruby Falls. Named by local mariner Capt. Chris Trucker after his daughter, Red Cone Creek is carved through rock formations stacked atop each other like building blocks. These rock walls are great for climbing and clambering over before reaching a series of freshwater swimming holes and waterfalls. The falls may be a gurgling torrent or a gentle trickle, depending on the time of the year.

Other sites we aim to visit in Doubtful Bay include the mighty Sale River and Steep Island.

Day 9: Horizontal Falls and Buccaneer Archipelago

The Horizontal Falls are one of the Kimberley's biggest attractions and are a result of the mammoth 11m tides the Kimberley is renowned for. Naturalist David Attenborough described the Horizontal Falls as 'one of the greatest natural wonders of the world.'

The Horizontal Falls are created as the ocean thunders through a narrow gorge in the McLarty Ranges. Water builds up on one side and is forcibly pushed through the bottleneck, creating a rushing horizontal waterfall of swiftly flowing seawater. Riding the rapids on our Zodiac inflatable tenders is one of the highlights of our Kimberley expedition cruises.

Talbot Bay is at the heart of the Buccaneer Archipelago, where rocks on the 800 or so islands are estimated at over 2 billion years old. At Cyclone Creek, you will see evidence of massive geological forces in the impressive rock formations and cruise through the Iron Islands, past Koolan Island, before enjoying sunset drinks at Nares Point.

Day 10: Lacapède Islands

The Lacapède Islands are a protected class-A nature reserve and are significant as a seabird nesting rookery for brown boobies and roseate terns. Other species often sighted at the

Lacepedes include Australian Pelicans, frigate birds, egrets and gulls. The four low-lying islands are also an important breeding and nesting habitat for green turtles.

If weather and tide conditions are suitable, we will explore the lagoons by Xplorer and Zodiac tender vessels.

As our incredible Kimberley adventures draw to a close, on our last evening aboard we enjoy the Captain's farewell drinks amongst new-found friends.

Day 11: Broome

Our incredible adventure along the Kimberley Coast concludes in Broome this morning at 8:00am. Bid farewell to new-found friends, the Captain and crew. A post-cruise transfer to Broome CBD or Airport is included.

If you're not transferring directly to the airport why not spend the day visiting world-famous Cable Beach or stroll the historic streets of Chinatown in central Broome.

Important Information:

Dietary Requirements:

Special dietary needs must be advised when booking.

Special Occasion:

If celebrating a special occasion during the cruise, details must be advised when booking.

Itinerary Subject to Change:

Due to weather, tides or mechanical reasons, the itinerary may be subject to change without notice.

Fuel Levy:

Fuel levies may be introduced when required. Should this occur, charges will be payable direct and subject to change without notice.

Meals:

- All meals including morning and afternoon tea (24 hour tea and coffee station, post mix soft drinks).

- House wine and beer served with lunch and dinner meal service.

Teilnehmer: min 20 bis max. 72 Personen

Transport: Ausflugsboot / Schiff

Includierte Mahlzeiten: Frühstück, Mittag, Abendessen, Snacks

Übernachtung: Schiff / Boot

Gepäck Limit: keine Angabe

geeignet für Menschen mit eingeschränkter Mobilität: nein (genauere Information auf Anfrage)

Rollstuhl geeignet: nein

Die Sprache während der Tour ist englisch
